UNIVERSITY OF CUMBRIA

Concordat to Support Research Integrity 22/23

Annual Statement September 2023

Professor Karen Shaw, Director
Research, Knowledge Exchange
and Graduate School
1. Introduction

The University is committed to supporting the highest standards of research integrity as outlined in the 2019 Concordat to Support Research Integrity. The five commitments are outlined below:

- Commitment 1: To uphold the highest standards of rigour and integrity in all aspects of research.
- Commitment 2: To ensure that research is conducted according to appropriate ethical, legal, and professional frameworks, obligations, and standards.
- Commitment 3: To support a research environment that is underpinned by a culture of integrity and based on good governance, best practice, and support for the development of researchers.
- Commitment 4: To use transparent, robust, and fair processes to deal with allegations of research misconduct should they arise.
- Commitment 5: To work together to strengthen the integrity of research and to review progress regularly and openly.

2. Policy Context

The University’s Research and Knowledge Exchange Committee (RKEC) is responsible for ensuring adherence to these commitments. Day-to-day management is undertaken by the Research Ethics Panel (REP), a sub-committee of RKEC. A number of policies are in place to support researchers and to uphold integrity, and these are available on the University’s public webpages or staff intranet (Staff Hub):

- Code of Practice for Research
- Postgraduate Code of Practice for Research
- Research Ethics Policy
- Research Risk Assessment Guidance
- Open Access Policy
- Lone Worker Procedures for Research
- Intellectual Property Policy

The Research, Knowledge Exchange and Graduate School Directorate (RKE-GS) is responsible for reviewing and updating these codes and policies on behalf of RKEC. The Research Skills Development Programme is open for PgRs and staff, featuring sessions on Ethical Research and Ethical Approval as well as an Induction and Introduction to Research.

These policies also interact and refer to relevant corporate polices, including the Corporate Public Interest Disclosure Policy (outlining support for whistle-blowers) and the University’s Disciplinary Policy. These are available on the University’s staff hub pages.

Research integrity is discussed at the corporate and policy level as well as at local levels via our Research Centres and Networks. This ensures an open and honest culture of research integrity and disclosure.

RKE-GS works closely with Library Services and the Head of Library Services and University Librarian, who is also a member of RKEC. Additional resources to support research integrity are available via the Library webpages, including:

- Principles of good data management
- Managing References
- Copyright and Research
- Research Output Metrics
3. Research Governance

Research governance is enabled through:

- The REP, which is Chaired by Associate Professor Paul Miller in the Institute of Health and comprises of representatives from each academic area as well as PgRs. There are two external panel members.
- The RKEC is chaired by a Deputy Vice-Chancellor (DVC) and comprises of Centre Directors, Institute Directors, and representatives from each Research Centre as well as relevant staff from the Research, Knowledge Exchange and Graduate School Directorate. This enables effective co-ordination of research activity and integrity. RKEC subsequently reports to Academic Board and relevant governance documents are reviewed by both REP and RKEC before being taken to Academic Board for final approval. Ethical approval is required for all research carried out by staff and students at the University and it is the responsibility of the research supervisor (at both undergraduate & postgraduate level) to ensure that research complies with University ethical guidelines. The REP is primarily concerned with staff and postgraduate student research, and is tasked with ensuring that the dignity, rights, and welfare of research participants are protected.

The REP will scrutinise proposals for research involving human participants (that are not otherwise subject to Health Research Authority [HRA] ethical approval) and where appropriate, non-human animals as identified. Proposals requiring NHS ethical clearance are expected to follow the most recent guidance provided by the NHS Research Ethics Service (NRES).

The Director of Applied Research and KE is the named senior member of staff to oversee research integrity and ensure that this information is kept up to date and publicly available on the institution’s website. The Head of Research & Knowledge Exchange is also listed as a contact for anyone wanting more information on matters of research integrity. Contact details for both these individuals are publicly available on our website.

4. UoC Code of Practice and research misconduct

The UoC Code of Practice for Research is a comprehensive document, and its provenance is founded in accepted international standards for research integrity which have not changed over the years save for the addition of detail via the development of local policies.

The Code of Practice for Research describes *inter alia*, the process in place at UoC for conducting research with integrity and also how UoC should respond to allegations of research misconduct. Those allegations may originate from any member of the University community or indeed from external sources and the University is under a duty to investigate and discharge allegations appropriately. The process is set out in paragraph 5 of the Code. In short, the Code puts into practice the five commitments set out in paragraph 1 above and the requirements within the Concordat to Support Research Integrity (https://www.universitiesuk.ac.uk/sites/default/files/field/downloads/2021-08/Updated%20FINAL-the-concordat-to-support-research-integrity.pdf p.16)

*As required by the Concordat, we can confirm there were 0 (zero) formal investigations of research misconduct undertaken by UoC across 22/23.*

This statement is discoverable and accessible on the UoC website: http://www.cumbria.ac.uk
