

BSC (HONS) BIOMEDICAL SCIENCES (WITH Integrated Foundation Year)

Institute of Science and Environment

| Academic Level: | 6 | Credits: | | 480 |
|----------------------|---|-----------------------|------------|-----------|
| UCAS Code: | C910 | | | |
| Awarding Body: | University of Cumbria | University of Cumbria | | |
| Delivery Site: | Fusehill Street Campu | s, Carlisle | | |
| Programme Length: | Full time: 4 years | | | |
| | Part time: 6 years Maximum Registration period: 8 years | | | |
| Mode of Delivery: | Blended learning | | | |
| Pattern of Delivery: | Full Time Part Time: learner will be provided with a specific learning plan. | | | |
| | Total weeks of study: | | 24 weeks | |
| | Delivery pattern: | | 2x 12 week | semesters |
| | Standard semester da | tes: | Yes | |
| PSRB: | The programme has been mapped against the QAA benchmark statements adopted by the Institute of Biomedical Science (IBMS) but is not currently accredited. | | | |

| Programme Webpage: | https://www.cumbria.ac.uk/study/courses/undergraduate/biomedical- |

| | sciences-with-integrated-foundation-year/ |

| Entry Criteria |
|--|
| The University's standard criteria for admissions apply. Please refer to the <u>Applicant Information</u> pages of the University website for more information. For <u>APL</u> , please refer to the University website. |
| Detailed criteria for admission to this programme can be found on the programme webpage: <u>https://www.cumbria.ac.uk/study/courses/undergraduate/biomedical-sciences-with-integrated-foundation-year/</u> |

PROGRAMME AIMS AND OUTCOMES

Programme Aims

By the end of this programme learners will be able to:

- 1. Instil in students an enthusiasm for Biomedical Science and involve them in an intellectually stimulating experience of learning.
- 2. Develop an inter-disciplinary approach to science and technology and appreciation of the biosciences in an industrial, academic, economic and social context.
- 3. Develop critical awareness of advances at the forefront of Biomedical Science and provide students with the ability to plan and conduct experiments independently.
- 4. Provide students with a knowledge and skills base from which they can proceed to employment or postgraduate study.

Programme Outcomes – Knowledge and Understanding

The programme provides opportunities for you to develop and demonstrate the following:

After 120 credits of study (FdCert) you will be able to demonstrate:

FK1. A knowledge and understanding of a range of data collection and handling techniques applied within the context of Biomedical Sciences.

FK2. The ability to apply and explain theories, models, concepts and principles that underpin the study of Biomedical Sciences.

After 240 credits of study (CertHE) you will be able to demonstrate:

K1. An appreciation of the molecular, cellular, and physiological processes of life and the interrelationship between them and normal functioning of the human body as well as diseases and their treatments.

K2. Knowledge in the methods of acquiring, interpreting, and analysing information with a critical understanding of the appropriate contexts for their use through the study of texts, papers, reports and data sets.

K3. Familiarity with the terminology, nomenclature of biomedical sciences and disease classification systems.

After 360 credits of study (DipHE) you will be able to demonstrate:

K4. Discuss a range of ways in which we can prevent, test, diagnose, treat, and manage disease.

K5. The ability to relate and apply the underpinning knowledge, appreciation and understanding gained within K1, K2 and K3 to the more complex content of subject specific sciences.

K6. Knowledge and understanding of the basic principles of research and analysis.

After 480 credits of study (BSc Hons) you will be able to demonstrate:

K7. Competence in the interpretation and analysis of biological, clinical, and chemical information.

K8. An awareness of the ethical and philosophical issues involved in Biomedical Sciences and the potential contribution research may make to the quality and sustainability of life.

K9. A systematic understanding of key aspects of Biomedical Sciences, gaining detailed knowledge, informed by contemporary aspects of a discipline.

Programme Outcomes – Skills and other Attributes

The programme provides opportunities for you to develop and demonstrate the following:

After 120 credits of study (FdCert) you will be able to demonstrate:

FS1. Academic, personal and professional skills needed to succeed in higher education.

FS2. The ability to apply a range of mathematical tools in the context of Biomedical Sciences.

FS3. Demonstrate specific skills, techniques and competencies needed to study and work in Biomedical Sciences.

After 240 credits of study (CertHE) you will be able to demonstrate:

S1. Gather data safely and appropriately using a range of techniques in the laboratory, keeping accurate records in an appropriate format

S2. Present information clearly and concisely using appropriate academic conventions both in written, visual and oral forms

S3. Develop subject specific skills associated with good laboratory practice including the safe handling of specimens, sample preparation and the use of relevant instrumentation considering factors such as accuracy, calibration, precision, replicability and accurate interpretation of data

After 360 credits of study (DipHE) you will be able to demonstrate:

S4. Evaluate and apply a range of qualitative and quantitative techniques in the laboratory setting, using complex data sets to inform decision making and draw appropriate conclusions especially where there is a level of uncertainty.

S5. Recognise and apply subject-specific theories, paradigms, concepts or principles.

S6. Further develop the independent and transferable skills necessary for self-managed and lifelong learning (e.g., working independently, time management, organisational, knowledge transfer and digital skills)

After 480 credits of study (BSc Hons) you will be able to demonstrate:

S7. Present complex information to a range of technical and non-technical audiences in a balanced and authoritative manner using appropriate oral, written, and visual techniques.

S8. Plan, execute and present an independent piece of research under supervision, in which qualities such as time management, problem solving, and independence are evident

S9. Recognise the moral and ethical issues of clinical and scientific investigations and appreciate the need for ethical standards and professional codes of conduct.

PROGRAMME FEATURES

Programme Overview

Biomedical Science is considered the branch of medical science specifically concerned with the laboratory diagnosis and monitoring of disease. Modern medicine is dependent on advances made by biomedical scientists who collectively explore the functioning of the human body in both a normal and diseased state with a view to unlocking the code within. Biomedical Science therefore encompasses many academic disciplines, for example, immunology, cell and molecular biology, biochemistry, pharmacology, physiology and microbiology.

The Biomedical degree itself ultimately aims to research the pathobiology of human disease and specific knowledge of disease processes will arise from the study of laboratory specialist subjects such as clinical biochemistry, cellular pathology, haematology and clinical genetics. The goal is for the graduate to understand and appreciate the complex science behind the cause, consequence, diagnosis and treatment of disease.

The program is taught by academic staff with extensive teaching, research and professional expertise. They bring together a wealth of knowledge and experience and are committed to providing high quality guidance and support. Furthermore a substantial amount of laboratory based experiential learning is provided alongside small group lectures and tutorials, as well as some larger group sessions. Collectively these will allow students to broaden skills sets and ultimately enhance employability.

Learning and Teaching

Teaching

Overview of the methods of learning and teaching used on the programme.

At Level 4 you typically have around 12 contact hours per week, typically consisting of:

- 8 hours of lectures
- 4 hours of lab work
- 2 hour(s) of personal tutoring per semester in L4. Additional personal tutor meetings may be requested, and module tutors can also be approached for individual module support.

Independent Learning

When not attending scheduled learning activities you will be expected to continue learning independently through self-study. Students will be supported in a progressive acquisition of subject

knowledge and skills, gradually advancing towards more independent learning whilst developing a reflective approach to personal progress. For example, exploring research and data analysis are studied at Level 5 preparing students for their Dissertation module at Level 6.

Teaching Staff

The Programme is taught by academic staff with extensive teaching, research and professional

expertise. They bring together a wealth of knowledge and experience and are committed to providing high quality guidance and support. For example, we have subject specialists in molecular biology, microbiology and genetics as well as anatomy and physiology, pharmacology, toxicology, and experience in clinical practice.

Assessment

<u>Year 1</u>

Written assignments, Presentations, Portfolios, Set Exercise and Written Exam

<u>Year 2</u>

Reports, presentation, portfolio, online test, written assignment.

<u>Year 3</u>

Written assignment, presentation, online test, poster, data interpretation and dissemination, research proposal, project.

Year 4

Written assignment, presentation, oral defence, poster, clinical case study, dissertation thesis, practical skills assessment.

Feedback

You will receive both a grade and written feedback on your summative work against predefined grading criteria. You will also receive feedforward designed to help you develop your skills and approach for future submissions. Guidance and support on specific assignments will be provided by your module tutors. Your personal tutor will also be able to give you generic support and signpost you to specialist support services within the University should you need additional help. Summative (final) marks and feedback will be provided within the timeframes specified within the academic staff handbook and Centre for Academic Practice Enhancement (CAPE) academic toolkit.

Graduate Prospects

Jobs that relate directly to a Biomedical Sciences degree include

- Biomedical scientist
- Biotechnologist
- Clinical research associate
- Clinical scientist, biochemistry
- Clinical scientist, haematology
- Clinical scientist, immunology
- Forensic scientist
- Microbiologist
- Physician associate
- Research scientist (life sciences)
- Research scientist (medical)
- Scientific laboratory technician
- Toxicologist

Jobs where a biomedical sciences degree can be a useful route of entry may include

- Medicine
- Genetic counsellor
- Medical sales representative
- Science writer
- Teacher

Typical employers could be

- Health and Safety Executive (HSE)
- Medical Research Council (MRC)
- NHS, including NHS Blood and Transplant (NHSBT)
- UK Health Security Agency (UKHSA)
- Private laboratories
- Pharmaceutical companies
- Animal and Plant Health Agency (APHA)

MODULES

| Year 1 | | | |
|--|-------------------------------|---------|------------|
| Code | Title | Credits | Status |
| UNIF3003 | Essential University Skills 1 | 20 | Compulsory |
| UNIF3005 | Essential Biology | 20 | Core |
| UNIF3015 | Scientific Investigation | 20 | Compulsory |
| UNIF3004 | Essential University Skills 2 | 20 | Compulsory |
| UNIF3016 | Essential Chemistry | 20 | Core |
| UNIF3017 | Environmental Sciences | 20 | Compulsory |
| Students exiting at this point with 120 credits would receive a FdCert Science | | | |

| Year 2 | | | |
|---|--|---------|------------|
| Code | Title | Credits | Status |
| HSOB4101 | Introductory Biochemistry | 20 | Compulsory |
| HSOB4102 | Cell Biology | 20 | Compulsory |
| HSOB4003 | Human Anatomy and Physiology | 20 | Compulsory |
| HSOB4004 | Introductory Microbiology and Immunology | 20 | Compulsory |
| HSOB4005 | Molecular Biology | 20 | Compulsory |
| HSOB4006 | Practical Laboratory Science | 20 | Compulsory |
| Otudante quiting at this point with 040 and its would provide a ContUE Dialogue | | | |

Students exiting at this point with 240 credits would receive a CertHE Biology

| Ye | ar | 3 |
|----|----|---|
|----|----|---|

| Code | Title | Credits | Status |
|----------|----------------------------------|---------|------------|
| HSOS5106 | Exploring Research | 20 | Compulsory |
| HSOB5004 | Human Genetics | 20 | Compulsory |
| HSOB5005 | Infection and Immunity | 20 | Compulsory |
| HSOB5006 | Medical Microbiology | 20 | Compulsory |
| HSOB5109 | Pharmacology and Physiology | 20 | Compulsory |
| HSOB5010 | Cellular and Molecular Pathology | 20 | Compulsory |
| | • | | • |

Students exiting at this point with 360 credits would receive a DipHE Biological Sciences

| Year 4 | | | |
|---|-------------------------------------|---------|------------|
| Code | Title | Credits | Status |
| HSOB6101 | Bioethics | 20 | Compulsory |
| HSOB6002 | Parasitology | 20 | Optional |
| HSOB6004 | Toxicology | 20 | Optional |
| HSOB6005 | Advanced Genetics | 20 | Optional |
| HSOS6106 | Dissertation | 40 | Compulsory |
| HSOB6008 | Clinical Biochemistry | 20 | Compulsory |
| HSOB6109 | Haematology and Transfusion Science | 20 | Compulsory |
| Students exiting at this point with 420 credits would receive a BSc Biological Sciences | | | |

Students exiting at this point with 480 credits would receive a BSc (Hons) Biological Sciences

Additional Module Information

Students choose one optional module to study in year 3. Students make this choice by the start of SEM2 of year 2. The number of optional modules validated or adopted for a programme must be proportionate to the predicted cohort size so that modules are pedagogically and financially viable.

| Key to Module Statuses | | | |
|---|--|--|--|
| Compulsory modules | Must be taken although it may be possible to condone/compensate as a marginal fail (within the limits set out in the Academic Regulations and provided that all core or pass/fail elements of module assessment have been passed). | | |
| Optional modules | Are a set of modules from which you will be required to choose a set number to study. Once chosen, it may be possible to condone/compensate as a marginal fail (within the limits set out in the Academic Regulations and provided that all core or pass/fail elements of module assessment have been passed). | | |
| Optional modules may be subject to availability and viability. If we have insufficient numbers of | | | |

students interested in an optional module in any given academic year, this may not be offered. If an optional module will not be running, we will advise you as soon as possible and help you choose an alternative module. Optional modules are normally selected 3 - 5 months in advance.

Timetables

Timetables are normally available w/c 1st August. Please note that while we make every effort to ensure timetables are as student friendly as possible, scheduled learning can take place on any day of the week.

This programme may also be made available on an infill part-time basis at the discretion of the academic programme leader. In such cases, you will study modules alongside the full-time cohort(s) that are running at the time

ADDITIONAL INFORMATION

Student Support

The <u>Student Enquiry Point</u> is a simple way to contact Student Services. Using the Student Enquiry Point tile on the Student Hub you can submit an enquiry to any of the Student Services teams, which includes:

- Careers and Employability
- Chaplaincy for faith and spiritual wellbeing
- Mental Health and Wellbeing
- Digital Skills
- Disability and Specific Learning Difficulty (SpLD)
- International Student Support
- <u>Library</u>
- Money Matters
- <u>Safeguarding</u>
- <u>Skills@Cumbria</u>
- Sports and Fitness Facilities
- <u>University Student Accommodation</u>

As a student at the University of Cumbria you automatically become a member of the Students' Union. The Students' Union represents the views and interests of students within the University.

The Students' Union is led by a group of Student Representatives who are elected by students in annual elections. They also support approximately 400 Student Academic Reps within each cohort across the entire University. The Students' Union represent the views of their cohort and work with academic staff to continuously develop and improve the experience for all University of Cumbria students. You can find out more about who represents you at <u>www.ucsu.me</u>.

You can email at any time on studentvoice@cumbria.ac.uk.

Course Costs

Tuition Fees

Course fees can be found here for undergraduates and here for international students.

The following course-related costs are included in the fees:

- Use of lab equipment
- All PPE except for a white lab coat which the student will need to provide

Additional Costs

The following course-related costs are not included in the fees:

You will be expected to purchase a white lab coat, students should budget around $\pm 10 - \pm 15$ for this.

All students will need to purchase stationery and may wish to purchase some textbooks (but purchase of textbooks is not specifically required). Extra costs may also be applicable to cover field trips, membership fees etc. although such features are usually options within the course. Books are reviewed annually and are therefore costs of these and the specific titles and editions are subject to change; course welcome information will provide an indicative list for the year. Most core textbooks are available via the University's library; however, students may wish to buy copies of any texts used to support your learning on your course. This could cost between £50 - £100 per year.

Costs of stationary vary over time, but students should budget for stationery and consumables for your own personal use. This should include notebooks, pens and pencils for taking notes in class and/or in the field. Students should also budget for the purchase of USB pen drives, as well as occasional printing and photocopying costs incurred in the preparation or submission of coursework. Whilst students will choose how much stationary is needed, expect to pay around £40 - £50 per year for these items.

Exceptions to the Academic Regulations

This programme operates in accordance with the University's Academic Regulations and Academic Procedures and Processes.

External and Internal Benchmarks

Programme outcomes are aligned to the QAA Subject Benchmark Statements for:

Biomedical Sciences:-

Disclaimer

This programme has been approved (validated) by the University of Cumbria as suitable for a range of delivery modes, delivery patterns, and delivery sites. This level of potential flexibility does not reflect a commitment on behalf of the University to offer the programme by all modes/patterns and at all locations in every academic cycle. The details of the programme offered for a particular intake year will be as detailed on the programme webpage:

https://www.cumbria.ac.uk/study/courses/undergraduate/biomedical-sciences-with-integratedfoundation-year/
