

Programme Specification

Programme Title and Name of Award	BSc (Hons) Criminology with Applied Psychology		
Academic Level	6	Total Credits	360
Professional Body Accreditation / Qualification	<p>Accredited by the British Psychological Society (BPS).</p> <p>Eligibility to apply for Graduate Basis for Chartership (GBC) with the BPS provided that students:</p> <ol style="list-style-type: none"> 1. pass all of the accreditation modules at Levels 5 and 6 including the dissertation module and 2. Graduate with a minimum of a lower second class (2.2) honours degree. 		
Date of Professional Body Accreditation	2016	Accreditation Period	Ongoing
UCAS Code	L613		
HECoS Code	100484 Criminology (50%) 100493 Applied Psychology (50%)		
Criteria for Admission to the Programme	<p>The University's standard criteria for admissions apply. Please refer to the <u>Applicant Information</u> pages of the University website for more information. For <u>APL</u>, please refer to the University website</p> <p>Detailed criteria for admission to this programme can be found on the programme webpage: https://www.cumbria.ac.uk/study/courses/undergraduate/criminology-with-applied-psychology/</p>		
Teaching Institution	University of Cumbria		
Owning Department	Business, Law, Policing & Social Sciences		
Programme delivered in conjunction with	Health, Psychology and Social Studies (HPSS)		
Principal Mode of Delivery	Blended Learning		
Pattern of Delivery	Full Time		

	This programme may also be made available on an infill part-time basis at the discretion of the academic programme
Delivery Site(s)	Fusehill Street, Carlisle
Programme Length	Full time: 3 years (Minimum) / 7 years (Maximum)
Higher Education Achievement Report (HEAR)	Upon successful completion of this programme, you may receive a Diploma Supplement/Higher Education Achievement Report (HEAR).
Exit Awards	You may be awarded one of the following Exit Awards if you fail to achieve the requirements of the full programme. BSc Criminology with Applied Psychology (300 credits) DipHE Criminology with Applied Psychology (240 credits) CertHE Criminology with Applied Psychology (120 credits)
Period of Approval	1 August 2020 to 31 July 2026

Cumbria Graduate Attributes

Throughout your studies, you will be provided with the skills and knowledge relevant to the global workplace. All successful graduates of the University of Cumbria will be:

- Enquiring and open to change
- Self-reliant, adaptable and flexible
- Confident in your discipline as it develops and changes over time
- Capable of working across disciplines and working well with others
- Confident in your digital capabilities
- Able to manage your own professional and personal development
- A global citizen, socially responsible and aware of the potential contribution of your work to the cultural and economic wellbeing of the community and its impact on the environment
- A leader of people and of places
- Ambitious and proud

Programme Features

Why do individuals commit crime? What are the impacts of crime on a personal and community level? The BSc (Hons) in Criminology with Applied Psychology is your gateway to understanding the psychological aspects of offending. It uniquely brings together two interrelated study strands into a coherent programme of study.

The applied nature of the programme means that you will focus on how psychological and criminological approaches are used in the real world, to inform policy and practice and more generally to enhance your understanding of human behaviour in a constantly changing global world.

This will include exploring the relationships between crime and social change, and the complexities of individual factors that affect human interactions and interpersonal processes.

The teaching team comes from a range of backgrounds, bringing with them a wealth of expertise from forensic psychology, research and work in the community, voluntary sector, policing and criminal justice settings. Tapping into this expertise, you will be given a range of opportunities to explore the professional application of theory in simulated situations based on real world scenarios. This includes engaging in multi-agency risk management procedures and determining the approaches that are followed by different criminologically informed professions.

You will be learning in small lecture and seminar groups alongside your peers on the Criminology with Applied Psychology, Criminology and Criminology with Forensic Investigation programmes. This gives you the opportunity for sharing ideas and experiences, maximising your knowledge and exposure to varying teaching methods. You will learn in environments, which replicate the relevant workplace setting. The specific focus on applying research methods to real world problems from the first year of your degree will enhance your subject knowledge and provide you with the tools applicable to a range of criminal justice and allied careers. Support for employability and volunteering is embedded within your programme to provide you with a realistic experience of your professional context. A focus on professional competency and readiness for work ensures that, on completion of your studies, you can operate confidently and effectively in your chosen careers and be active in your personal and career development.

Because you will be splitting your attention between Criminology content and accredited modules in Applied Psychology, programme leaders will collaborate on a regular basis to ensure that there is communication between programmes and staff and will work together to enhance your learning experience. Both department and programme staff have an ongoing and collaborative working relationship with a wide variety of stakeholders including the British Psychological Society, Probation, Police, and a number of voluntary and commercial organisations.

What is distinct about studying for a Criminology degree at the University of Cumbria is an embedded programme focus on the Cumbrian region. Famous for its beautiful scenery, lakes and mountains, Cumbria is a very popular tourist destination with 23 million people visiting a year. And yet, although not on the scale of larger urban areas, it still experiences the whole range of crime and social harm, while the geographical terrain, isolated communities and rurality present a number of unique challenges to implementation of law enforcement policies, strategies and meeting victim's needs.

The natural beauty and idyllic nature of Cumbria often make crimes less visible and victims harder to reach. Yet domestic violence, sex and hate crimes all take place in this rural area. Cases of sexual exploitation and domestic abuse in tightly knit rural communities pose a criminological and psychological challenge, as do cases of modern-day slavery for agricultural and household purposes. You will also gain insight into other rural crimes, such as county lines violence, exploitation and drug dealing. You will use theoretical knowledge, research and practical skills gained on the programme, apply it to and explore psychological, social, cultural and criminogenic issues that affect this area.

The controversial 'sport' of foxhunting, now illegal, has a long history in Cumbria. Hunting, both legal and illegal, remains a point of contention for rural communities, attracting protesters and saboteurs. Hunts are not the only events that have a complex history and impact on our region. Cumbria's Appleby Fair, a World-famous Traveller festival, during which a small, secluded market town is transformed by an influx of visitors from diverse communities – participants, tourists and voyeurs – and a significant surge in police presence, is another element of our area's social and cultural complexity. These phenomena matter and you will be invited to consider these and other intersecting themes critically throughout the programme.

Studying Criminology and Applied Psychology at the University of Cumbria allows you to develop an appreciation and understanding of the global, national and local perspectives on crime. We look at the ways in which policies and legislation at each of those levels shape responses to crime and the

role of the different actors within the criminal justice systems and the polity. In the first year of the programme, you will study a range of modules designed to introduce you to core theoretical concepts in both disciplines. You will study the foundational concepts of criminology and be introduced to the criminal justice system in England and Wales where you will learn about the individual roles and responsibilities within key organisations. There is a strong emphasis on employability throughout the programme. You will also develop an enhanced understanding of the individual level of offending and victimisation and your core modules in psychology will introduce you to key perspectives on human behaviour. You will also gain insight into research methods and data analysis techniques in applied psychology. The second and third years build on these critical foundations, offering you the opportunity to gain a deeper critical understanding of criminological theory, scholarship and practice, and to analyse further aspects of criminal justice by considering policing, youth justice, race and ethnicity prisons and punishment and looking at bringing offenders to justice. The psychological element will provide you with the opportunity to study a range of modules that cover human development across a range of contexts, and consider crime introducing you to biological, cognitive and social perspectives in psychology.

Criminology with Applied Psychology provides you the opportunity to fully engage with two exciting and developing disciplines by critically analysing criminological and psychological perspectives on a range of contemporary issues. You will consider diverse forms of crime and disorder, but also social harms, exclusion and division, gender, race and ethnicity, and their connections to victimisation and offending. The modules you will study focus on psychological and criminological theory and practice in the context of the criminal justice system, reflecting the breadth of contemporary scholarship in both allied disciplines.

Our aim is to ensure that you receive an academic qualification that reflects the current challenges faced by psychologists interfacing with criminal justice institutions and supply you with a skill set necessary to pursue professional careers in Psychology and allied professions. You will be able to explain the motivations of individuals who commit crime and how that impacts on individuals, communities and the wider society. You will be able to apply that knowledge to the criminal justice system and explore new and innovative theories, ideas and strategies aimed at reducing criminality and meeting the needs of victims.

The combination of Criminology and Psychology provides you with an opportunity to critically explore and examine the basic psychological processes that underpin human behaviour, and to apply this knowledge to a range of issues and behaviours within the criminal justice system. This programme seeks to incrementally increase your subject knowledge alongside your academic development and further seeks to ensure that at the point of leaving you have those employability skills to be best position yourself for your chosen career or have the skills necessary to move forward to Postgraduate study. In all cases, the programme seeks to ensure you are prepared for lifelong learning.

Criminology with Applied Psychology is an extremely varied, interdisciplinary programme, constantly growing, evolving and developing to deal with human behaviour and changes in the world. In this context, you need to be aware of evolving debates and build a knowledge base that includes a wide range of theories, concepts and perspectives. This will be matched by the critical abilities necessary to construct your own ideas and solutions when faced with new problems and challenges. Research and critical thinking skills will help you identify and incorporate the most suitable sources of information to these challenges and problems.

Criminology with Applied Psychology will equip you with the academic, research, analytical and problem-solving skills suited to a wide range of careers both within criminal justice, psychology or further afield. It will afford you many opportunities to develop and practice the kind of 'transferable skills' – negotiation, decision-making, independent and team-working, self-motivation, organisation, management, leadership and more. The research and practical skills the programme offers are highly valued by a breadth of potential employers. That will open up a wealth of potential employment opportunities in organisations, across the public and private sector, in business and

within a range of charitable organisations. The University of Cumbria employability strategy 'My Career Enriched' recognises the need to embed employability throughout the curriculum. The Criminology with Applied Psychology programme adopts the Career Ahead Employability Award as its framework. Within the employability modules, you will be able to achieve the Bronze Award at the end of level 4, and may then progress, utilising your work or volunteering experiences, to Silver, and Gold or Platinum Award by the end of your programme.

Professional Accreditation:

The programme has been accredited by the British Psychological Society (BPS).

The British Psychological Society is the Professional Body for psychologists and their role broadly speaking is to *"develop, promote and apply psychology for the public good. Enhance the efficiency and usefulness of psychologists by setting high standards of professional education and knowledge. Cover all areas of psychological research and practice."* We encourage students to consider student membership of the BPS, as there are a number of benefits to joining the society, details of which can be found on our intranet pages.

It is important to note that your eligibility to Graduate Basis for Chartership (GBC), which is the first step on your path to becoming a professional psychologist, is not an automatic outcome of your degree. There are a number of conditions that you need to meet for eligibility: To qualify for eligibility for Graduate Basis for Chartership (GBC) with the British Psychological Society (BPS) you must:

1. pass all of the accreditation modules at Levels 5 and 6 including the dissertation module and
2. graduate with a minimum of a lower second class (2.2) honours degree

Aims of the Programme

The overall aims of the Programme are:

1. Critically explore major concepts and theoretical approaches in the fields of psychology and criminology.
2. Develop a critical and reflective approach to the ongoing study of psychology, crime, deviance, harm and the responses of criminal and youth justice, acknowledging how diverse political, cultural, societal and moral values – including your own - impact on these.
3. Engage students with a variety of learning experiences that build on skills and knowledge at each level of the programme to facilitate the development of a critical understanding of the nature of psychology, its practice and its application to a variety of settings.
4. Develop a comprehensive working knowledge of a range of quantitative, qualitative and mixed research skills and analytical methods.
5. Reflect and act on ethical guidelines as laid down by the British Psychological Society (BPS) and the University of Cumbria.
6. Respond to contemporary debates in Psychology concerning the use and misuse of psychology within systems in society, seeking to develop the psychologist as a reflexive practitioner.
7. Stimulate you to evolve your intellectual capacity, research, analytical and cognitive skills through the acquisition of knowledge, problem solving and reasoning where you will take responsibility for your learning and develop into a sound, independent learner.
8. Equip you to progressively develop your intellectual capacities and career management skills throughout your programme and beyond, whilst also allowing for the development of the full range

of interpersonal and transferrable skills giving you the best possible chance of securing remunerative graduate employment at the conclusion of your studies.

Level Descriptors

Level Descriptors describe in general terms the expected outcomes you will achieve at each level of study as you progress through your programmes. They describe the relative demand, complexity, depth of learning and learner autonomy associated with a particular level of learning and achievement. The University's Level Descriptors are aligned to the national Framework for Higher Education Qualifications (FHEQ) and are a key mechanism for ensuring the academic standards of the University's provision.

At Level 4: (Usually Year 1 undergraduate), you will be able to demonstrate that you have the ability:

- To apply a systematic approach to the acquisition of knowledge, underpinning concepts and principles and deploy a range of subject specific, cognitive and transferable skills.
- Evaluate the appropriateness of different approaches to solving well-defined problems and communicate outcomes in a structured and clear manner.
- Identify and discuss the relationship between personal and workplace experience and findings from books and journals and other data drawn from the field of study.

At Level 5: (Usually Year 2 undergraduate), you will be able to demonstrate that you have the ability:

- To apply and evaluate key concepts and theories within and outside the context in which they were first studied.
- Select appropriately from and deploy a range of subject-specific, cognitive and transferable skills and problem-solving strategies to problems in the field of study and in the generation of ideas effectively communicate information and arguments in a variety of forms.
- Accept responsibility for determining and achieving personal outcomes.
- Reflect on personal and workplace experience in the light of recent scholarship and current statutory regulations.

At Level 6: (Usually Year 3 undergraduate), you will be able to demonstrate that you have the ability:

- To critically review, consolidate and extend a systematic and coherent body of knowledge.
- Critically evaluate concepts and evidence from a range of resources.
- Transfer and apply subject-specific, cognitive and transferable skills and problem-solving strategies to a range of situations and to solve complex problems.
- Communicate solutions, arguments and ideas clearly and in a variety of forms.
- Exercise considerable judgement in a range of situations.
- Accept accountability for determining and achieving personal and group outcomes.
- Reflect critically and analytically on personal and workplace experience in the light of recent scholarship and current statutory regulations.

Programme Outcomes – Knowledge and Understanding

The programme provides opportunities for you to develop and demonstrate the following:

After 120 credits of study (CertHE) you will be able to demonstrate:

K1. The development of criminology and psychology as a distinct area of study and inquiry, and their multidisciplinary or interdisciplinary nature including how crime, deviance and victimisation are socially, legally and politically constructed and theoretically explained.

K2. The development, role and organization of efforts to reduce and prevent crime, deviance and harm, through policing, criminal and youth justice, to ensure safety, security and human rights, including the role of the state and non-governmental agencies

K3. Knowledge and understanding of a range of approaches to psychological research and the rudiments of designing, collecting and analysing different types of data plus knowledge of factors that influence research, policy and practice within applied psychology and criminological settings.

K4. Different approaches crime, deviance, harm and victimization including relationships between power, crime and social divisions, including gender, class, ethnicity and race, and the impact of globalisation

After 240 credits of study (Dip HE) you will be able to demonstrate:

K5. An ability to construct reasoned arguments, synthesising relevant information and exercising critical judgment.

K6. An ability to apply key theoretical approaches to Criminology and Psychology across a range of practical and professional contexts

K7. A detailed knowledge and critical understanding of a range of influences on psychological development, functioning and behaviour and how these are theorised and applied across the core domains of biological, cognitive, developmental and social psychology, individual differences, and the conceptual and historical issues that have shaped contemporary psychological inquiry;

K8. A detailed and comprehensive knowledge and critical understanding of a range of approaches to psychological research and competence in the design, collection and analysis of different types of psychological data.

After 300 credits of study (BSc) you will be able to demonstrate:

K9. A detailed and expert knowledge of a range of specialist areas and applications in psychology and criminology, knowledge that is situated at the leading edge of the disciplines.

K10. A specialist knowledge and a critical understanding of a range of approaches to psychological and criminological research and competence in the design, collection, analysis and application of different types of data.

K11. A critical and specialist knowledge of factors that influence research, policy and practice within applied psychology and criminological settings.

After 360 credits of study (BSc Hons) you will be able to demonstrate:

K12. Detailed knowledge and specialist understanding of an area of psychology that forms the basis of your empirical dissertation.

Programme Outcomes – Skills and other Attributes (including Employability Skills)

The programme provides opportunities for you to develop and demonstrate the following:

After 120 credits of study (CertHE) you will be able to demonstrate:

S1. Written and oral communication skills, including the clear presentation of research procedures, academic debates and the student's own arguments; using information technology, interpret and draw inference from statistical data.

S2. Time planning, management, and the different strategies and dispositions involved in productive group/independent working environments.

S3. Formulating researchable problems within a general area of concern, evaluating evidence of diverse kinds and drawing appropriate conclusions.

After 240 credits of study (DipHE) you will be able to demonstrate:

S4. Develop professional values and understanding of anti-discriminatory practice, moral and ethical issues, legal principles, social divisions and diversity within the criminal justice sector.

S5. Data analysis, including indexing and retrieval of both quantitative and qualitative data as well as identifying the most important arguments or evidence in a text and recording and/or representing these

S6. Distinguishing between experimental and observational knowledge, between correlation and causation, and the importance of controlling for prior variables when analysing and discussing association.

After 300 credits of study (BSc) you will be able to demonstrate:

S7. A range of transferable academic skills and capabilities to promote lifelong learning and the transferability of these to employment.

After 360 credits of study (BSc Hons) you will be able to demonstrate:

S8. Bibliographic, referencing skills and computing: the identification of relevant published and web-based materials in relation to a particular topic in Applied Psychology and the appropriate presentation of such research data

External and Internal Reference Points

The following Subject Benchmark Statements and other external and internal reference points have been used to inform the Programme Outcomes:

This programme has been designed in line with the 2014 QAA [Subject Benchmark Statement for Criminology](#) and [The Quality Framework for Learning and Development in the Justice, Community Safety and Legal Sector](#)

British Psychological Society Handbook for undergraduate and conversion programmes (2012) – presents new accreditation standards

http://www.bps.org.uk/system/files/images/undergraduate_accreditation_2012_web.pdf

HEA Psychology Student Employability Guide (2011)

<http://www.heacademy.ac.uk/resources/detail/subjects/psychology/Employability-guide>

Other internal reference points may include:

- [UoC Strategic Plan](#)
- [UoC Learning, Teaching and Assessment Strategy](#)
- UoC Departmental Business Plans
- [UoC Academic Regulations and Academic Procedures and Processes](#)
- UoC Collaborative Provision Strategy

Graduate Prospects

The dual focus on criminology and psychology will give you a range of transferable skills such as critical thinking, analytical and communications skills. You will be attractive to employers both inside and outside the criminal justice sector.

The development of generic transferable skills will be underpinned by formal knowledge of criminological and psychological processes. For example, communication skills can be enhanced by knowledge of theories of communication and social processes; problem-solving skills can be supported by knowledge of underlying cognitive and behavioural processes. Your basic IT skills will be enhanced by the ability to interpret both numerical and textual data, and to communicate and present such information appropriately and undertake computer-based analyses of psychological test results.

You will also gain criminological expertise and skills to give you the competitive edge in applying for careers in organisations allied to the criminal justice system and related fields, or for postgraduate studies.

Academic staff utilise their links with professionals in a range of criminal justice institutions; prisons, courts, approved premises / probation and the police, and community-based services such as victim and offender focused charitable organisations. These collaborative relationships will provide you with outreach, engagement and volunteering opportunities which you can avail yourself of during your degree. Such exposure will focus your insight into your future career of choice and enhance your employability through developing professional networks.

Contact with our alumni demonstrates our graduates have gone into varied careers from Probation, Prison Service, Forensic Psychology, Chartered Psychologist, Victim Support and Drug & Alcohol work. A significant number have also gone into research and/or moved into postgraduate study - some have combined work and PG studies.

Learning, Teaching and Assessment Strategies employed to enable the Programme Outcomes to be Achieved and Demonstrated

As a student at the University of Cumbria, you are part of an inclusive learning community that recognises diversity. You will have opportunities to learn by interacting with others in a collegiate, facilitative and dynamic learning environment. Teaching, assessment and student support will allow equal and equitable opportunities for you to optimise your potential and develop autonomy.

We seek to create a stimulating and innovative community of learning, whether encountered on campus or at a distance, on placement or in the workplace. Facilitated by our expert practitioner staff, you will experience a learning environment that is well equipped, flexible, and stimulating.

The programme learning and teaching strategy has been developed with reference to the University of Cumbria Learning and Teaching Plan:

1. To place student learning at the heart of what we do
2. To promote learning partnerships
3. To embrace innovative approaches to learning, teaching and assessment
4. To continue to recruit well qualified, high quality staff
5. To provide staff development opportunities appropriate to a University focused on student learning
6. To ensure quality provision through robust review and enhancement processes

Learning and Teaching

In line with the University's Quality Handbook the programme is designed to ensure that you develop understanding and a critical appreciation of criminological and psychological and research and its uses in a changing social world.

Learning and Teaching methods include lectures, seminars, debates, group work activities, presentations, microteaching, poster presentations, portfolios and examinations. The use of a virtual learning Environment [VLE] provides a platform for communication, discussion and collaborative working. Teaching delivery facilitates the enhancement of IT skills, life-long learning and an appreciation of cognitive and transferable skills. Throughout your degree you will have opportunity to access various self-study opportunities through the VLE, such as LinkedIn Learning. These will give you an opportunity to familiarise yourself and develop proficiency in career-relevant software and applications.

A range of teaching learning and assessment methods are deployed across the programme. The programme develops knowledge acquisition, critical skills and independent thinking through varied teaching methods. Additionally, graduates need to be capable of assimilating and organising information quickly and effectively and be self-learners, capable of keeping up to date with new developments. The learning and teaching methods are designed to produce graduates who meet these criteria.

Problem based learning features heavily in core modules shared across the criminology programmes. This enables you to share your learning with students from different criminology disciplines / working towards different criminology careers. Together you can explore how different professionals apply theory in simulated crime scenarios that are informed by real world events.

The programme team are very aware of the variety of ways in which students learn. Therefore, to maximise access to learning on the programme, and to ensure that as many learning styles as possible are accommodated, a range of learning and teaching strategies are adopted.

The delivery schedule uses a mixture of year-long and semester long modules where shorter bursts of academic activity are interspersed by slower paced modules, with activities that are more reflective. E.g. In Year 1 Becoming a Criminologist, a year-long module, allows time to understand the impact of crime on society that the Crime and Deviance module explains, alongside specific study of the make-up of the Criminal Justice System in a dedicated module. Both approaches allow for periodic formative assessment and feedback towards the development of summative assessments with the opportunity to balance coursework across the academic year..

In recognition of the fact that initially students are challenged by different styles of teaching and learning in higher education, the pattern of your contact hours is designed to provide plentiful

contact during level 4, (48 hours per 20 credit module). This level is reduced to 36 hours at levels 5 and 6, as your independent study skills are developed, culminating with a significant element of independent study at level 6. Finally, the dissertation module demands sustained independent study and research with minimal class contact but increased direct tutor supervision.

Summative and Formative Assessment

You will be assessed on your achievement of the programme learning outcomes, which, in turn, are achieved by meeting the learning outcomes of the modules. The assessment of the programme learning outcomes will therefore be achieved by assessment at the module level. Selection of the methods for assessment will be determined by the requirements of each individual module and the rationale for selection of those methods will be left to the module specifications.

A key aspect of the programme is that you are able to convert your learning by critically reflecting on practice and experience, in line with the QAA benchmark statements (2.1). This is achieved through both formative and summative reflection throughout the programme. You are expected to be able to demonstrate a range of cognitive and intellectual skills together with techniques specific to criminology and applied psychology. You should also be able to demonstrate relevant personal and interpersonal skills.

A variety of assessment methods are used to ensure you have achieved the outcomes related to knowledge and understanding, including:

- Essays
- Exams
- Portfolios
- Case Studies
- Reports
- Presentations – Oral and Posters
- Assignments
- Dissertation

Formative assessment is an integral part within each module and formative feedback is a developmental tool providing the opportunity for you to obtain advice, comment and opinion at an early stage in the assessment process enabling you to participate in and develop your ideas and strategies. Formative assessment allows you to practice the requirements for summative assessment better enabling you to assess your own strengths and areas for improvement. Formative feedback can take a number of forms including short essays, research exercises, peer reviews, presentations, mock examinations and on-line activities, such as blogs and wikis. These also provide the opportunity for the discussion of ideas in a critical and constructive way.

Assessments are chosen to examine your ability to integrate theory and practice, and to think critically in relation to theory, empirical research and practice. Subject specific, professional and transferable skills (negotiation, communication, time management, presentation, report writing) are developed within classroom-based and independent learning activities. Most modules assess a variety of skills, either directly or indirectly through the assessment work for the module. The dissertation module enables you to study and research into a specific topic in depth and develops further the capacities for self-managed learning and critical thinking. Critical reflection and challenge are embedded across the programme within both formative and summative assessment.

Wherever possible and appropriate these assessments are based on real-world case study materials drawn from student experience, provided by tutors, or where such data is unavailable or inappropriate, simulations. As a result, the analysis and evaluation of case study material plays a large part in the assessment process.

You will also be encouraged to participate and contribute to a wide range of non-core activities within the university community that may involve activities arranged by the Students Union and the UCSU Criminology Society.

Student Support

We provide responsive learner support that promotes student success. Our approach to learner support is designed to support achievement and progression, champion inclusivity and accessibility, prepare you for opportunities beyond study, and promote independence and resilience, enabling you to achieve your potential.

As a student of the University of Cumbria, you will be taught by academics and expert practitioners who facilitate learning through structured inquiry. You will be provided with access to high quality academic resources through physical and digital libraries and will be supported to develop skills that enable you to become a critical, reflective, discerning and independent learner and researcher.

Induction

Your first week at the University of Cumbria – ‘Welcome Week’ – offers a range of activities as an introduction to your course and the wider university during which time you will meet staff from across the teaching and administration team. You will find your way around the campus, learn how to access timetables, teaching materials and other online resources, begin finding your way around Carlisle and begin spending time with your fellow students.

From the start of term, the university runs a number of jobs and volunteering fares to help students find part time work to support their studies and/or public and charitable organisations that offer the sort of experience that can significantly increase post-graduation employability.

Personal Tutoring

You will also be allocated a Personal Tutor. Your Personal Tutor will be proactively involved in the delivery of your programme and will have contact with you throughout your time at the University. They will support your learning and development, including through tutorials, Progress Reviews and other support as outlined in the Personal Tutoring Policy. The team are aware that employers value experience so, in collaboration with your Personal Tutor, you are encouraged and supported to think about the subjects/ environments you are interested in working with and how to get involved with local support groups or projects. By narrowing down your preferences it will allow you to focus on specific employers and voluntary organisations. To further support you with finding a voluntary role the programme leader in conjunction with the Student Union and Cumbria Council for Volunteering (CVS) organises a yearly ‘Volunteer Fair’ at the University where a range of organisations with links to the criminal justice system showcase their volunteering opportunities.

Personal Development Planning

Alongside your Personal Tutor you will be given additional support to scaffold, monitor and map your learning and in particular their graduate/transferable skills. The Career Ahead 3 awards are embedded in the programme at Levels 4, 5 and 6 and throughout we will be encouraging you to take up voluntary work in the criminal justice field. In the first year we embed skills of time management, group/teamwork, independent thinking, presentation skills and engaged thinking. In the second year these skills are developed further, and you are supported to do this with more analytical work such as portfolios and a research proposal on a topic chosen by you. In the third year, your personal development is the platform upon which you will complete your research proposal in your specialism by writing up your work and presenting your findings at Poster Symposium held at the University. You will also be supported and given the opportunity to complete a Personal Development Plan. This is a facilitated process and can be embedded within the course and available through Pebblepad

Library and Academic Support (based in Information Services)

Module leaders will collaborate with Library and Academic Advisors to ensure that your reading and resource lists are current, and items are available via the library discovery tool OneSearch. In order to maximise access, availability and usefulness, ebooks and electronic journal titles will, in most cases, be prioritised. You can access a wide range of electronic and print content using [OneSearch](#) and you can find out more about key texts, databases and journals for your subject by accessing the library's [subject resources webpages](#). Where appropriate, module reading, and resource lists will be made available to you electronically using the University's [online reading and resource list system](#).

The [Skills@Cumbria](#) service can help support your academic skills and success throughout your programme. The service is delivered by a team of professional Library and Academic Advisors. It includes a suite of [online self-help resources](#) accessible 24/7 via the University's website and Blackboard site. It also provides group and individual advice and guidance accessible through and alongside your course and by different means such as face to face, email or virtual. Visit [skills@cumbria](#) for more details.

IT and Technical Support

Technology is an invaluable asset when it comes to studying, so it's important you know how to make the most out of the excellent [facilities](#) we have available. Our aim is to ensure you can access university electronic resources from anywhere or any device, whether on or off campus. The [Student Hub](#) is your one-stop gateway to all university systems, Outlook email, and OneDrive.

Whether you consider yourself a computer expert or you're not confident about your IT skills, we're always around to ensure you get the level of support you need. We have a wealth of information and support available on the [website](#) and have a dedicated IT Service Desk where you can talk to someone by phone or log your question online from anywhere, at any time.

Student Support Services

Student Support Services offer a wide range of support, including careers and employability, financial help, counselling, health and wellbeing and support for disabled students and those with specific learning requirements. We also offer mentoring by trained students which you can request at any point during your studies. We know that you want to get the most out of your programme, make the best use of your time and find or continue in the career you always dreamed of. Access university support and facilities easily and quickly via the [website](#) and/or via the Student Services guidance tile on the [Student Hub](#).

In addition to the range of guidance above, you have the opportunity to further develop your personal, academic and professional skills by taking part in a number of initiatives coordinated and delivered by professional services advisers:

Headstart

Head Start is a self-learning pre-entry module that is completed online and at your own pace. The module gives new undergraduate students an opportunity to prepare for their transition into university and to start to develop the academic skills that will help them become successful students.

All UG students are given the opportunity to register and complete Head Start prior to entry on their main programme of study. If you haven't been able to complete Head Start before starting your course, you can access the module via Blackboard by selecting the Skills@Cumbria tab and then the Head Start tile. Learning at university, academic writing and referencing are the key topics introduced in the module and previous students have told us how useful they have found the online resources and activities.

Head Start Plus

Head Start Plus is also an online skills development course, designed to support students who are about or who have just started study at level 5 or 6 (2nd and 3rd year undergraduate). This course is

particularly recommended to students who may not have studied at HE level for some time or who are transitioning into the higher HE levels. The course provides a useful refresh on academic skills and practice and an insight into the expectations of tutors at those levels.

This course is free and available via the Open Education Platform powered by Blackboard. To access the course, follow the link to <https://openeducation.blackboard.com/cumbria> and set-up a free account with Open Education. Once logged on, select the course free of charge and work through it at your own pace.

Peer Mentoring @ Cumbria

You will be allocated a student Mentor who will be in touch to offer a non-judgemental and friendly hand and to help with various aspects of your student experience, from making friends to settling in, to helping you understand the expectations of academic study and dealing with assessment worries.

Mature Students' Events

Whether it is a coffee morning, lunchtime gathering or a social event, there are events happening throughout the year to link you up with other mature students who will also be juggling a number of commitments alongside their studies.

Help is at Hand Events

Keep a look out for these interactive events on campus around October and January. You are encouraged to attend these as they showcase the range of support available here and give you the opportunity to talk to people from Finance, Accommodation, the Students' Union, the Wellbeing and Disability Team etc.

Career Ahead+

Career Ahead+ is the University of Cumbria's Employability Award. Completing Career Ahead+ will help you recognise and develop your skills, providing a greater opportunity for you to get the job you want when you graduate. The award is based on what employers look for in an ideal candidate, in relation to skills, knowledge and experience. You will be supported with career direction, gaining experience, and providing all the skills needed to complete the perfect application and be successful in that all important job interview. Contact careerahead@cumbria.ac.uk or visit www.cumbria.ac.uk/careerahead for more information.

Methods for Evaluating and Improving the Quality and Standards of Learning

Mechanisms used for the Review and Evaluation of the Curriculum and Learning, Teaching and Assessment Methods

- Module Evaluation
- Programme Validation and Periodic Review
- Annual Monitoring
- Peer Review of Teaching
- External Examiner Reports
- Student Success and Quality Assurance Committee
- British Psychological Society review cycle

Mechanisms used for gaining and responding to feedback on the quality of teaching and the learning experience – gained from: Students, graduates, employers, placement and work-based learning providers, other stakeholders, etc.

- Staff Student Forum
- Module Evaluation Forms
- Programme Evaluation: National Student Survey, UK Engagement Survey
- Module/Programme/Personal tutorials
- Meetings with External Examiners

Date of Programme Specification Production:

March 2019
